NEWS FROM THE TOWN OFFICE

At the meeting of the Board of Selectmen on April 11th it was voted to discontinue the plowing of state highways by the Bethel Highway Department. The State Highway Commission is being notified that the town will no longer be plowing from Bethel to the New Hampshire State Line or Newry Corner or to the vicinity of Trap Corner. This amounted to a total of 34 miles. Two factors entered into the decision, one being the increased costs of operation without increased rental rates by the State. The other reason that much improved service will be given to our own streets and ways. For example the snow on Main Street can be removed much more quickly after a storm as the trucks will be available instead of being out on the State Highway.

Paul Carter and Harold Carver have requested that the old road northerly of the railroad right of way, which leads past their properties be discontinued. As this is a County Road laid out by the County Commissioners in 1836, it can be discontinued only by the Commissioners. The Selectmen by agreement with the parties concerned will petition the Commissioners in the near future for a public hearing.

Mrs. Maude Kittredge visited at the home of Mrs. Herbert Kittredge Wednesday before leaving for Massachusetts for a visit. Week end guests of Mr. and Mrs. Herbert Kittredge were Mrs. Walter Kittredge and Karen of Bath and Miss Katy Feener of Andover.

A recent week end guest of Mr. and Mrs. Gerald Jacques and Kelly Ann was Mrs. Jacques's father, Kenneth Pease, of Connecticut.

Bethel Health Council needs clothing. If possible please leave clothing at the Douglas barn. If not convenient, clothing will be picked up. Call Mrs. Vance Richardson, VA 4-2831.

Correct driving calls for a lot of knowledge, proper attitude and skill. Bethel teenagers will play their driving talents on the line April 29 for the Jaycee teenage driving rodeo. This is sponsored nationally by Insurance Institute for Highway Safety and Pure Oil Co. The automobile is the courtesy of Bennett's Garage.

Mrs. George Stowell entertained with a coffee on Friday in honor of Mrs. Russell Carson who recently moved to Kilborn Street. Those present were: Mrs. Earl Davis, Mrs. Robert Clemons, Mrs. Alfred Brown, Mrs. Robert Keniston, Mrs. Eugene Buswell, Mrs. Jerry Smith, Mrs. Eldon Greenleaf, Mrs. Donald James, Mrs. Rudy Royer, Mrs. Charles Blake, Mrs. Alton Luxton.

V. A. NEWS LETTER

Unmarried minor children of deceased veterans may be eligible for pension payments even when their mother, the veteran's widow is not eligible. Dr. Joseph S. Weltman, Director, Veterans Administration Center, Togus, says.

Most frequent examples occur when the widow becomes ineligible due to re-marriage or receives income in excess of the legal limit. Ineligibility of the widow does not affect the minor children.

No problem arises when widows on the pension rolls become ineligible. Dr. Weltman pointed out, because pension payments are stopped to the widow but continued to the eligible minor children.

But if the widow has not applied for a pension, knowing that she is not eligible, or if her application was not allowed, the VA has no record of any minor children who may be eligible.

Unmarried children of deceased veterans are eligible for pension payments until they are 18, or until age 21 if they

Did You Know These Fleet Facts?

Did you know that—in event of "limited warfare"—American seapower rushing troops, equipment and supplies to any battle station in the world includes not only 932 U.S.-flag vessels but also a fleet of 450 "Flags of Necessity" ships?

Did you know that this reserve fleet speeds difficult operations like refueling at sea...guarantees more ships when and where we need them...adding to the security of you and your family here at home? The Navy and Defense Departments heartily champion "Flags of Necessity" ships. And unlike U.S. flag ships, this fleet is not government subsidized by taxpayers' money!

Did you know that this "private navy" doubles the carrying power of U.S. all tankers and bulk carriers?...That while it is registered under the flags of Panama, Liberia or Honduras, it is owned and operated by Americans engaged in international trade?...That it is pledged to our national defense when needed?

To Recondition 42 Miles Pipe Line

When the 237 mile-long 18" line of the Portland-Montreal Pipe Line System was laid in 1950 about 147 miles was coated and wrapped in locations where surveys of soil conditions and other factors indicated there might be corrosion. It was realized at that time that the 90 miles of uncoated pipe would require periodic inspection and if greater corrosion would be found than expected, it would be necessary to take the line out of the ground, clean, coat and wrap it. This work is generally referred to in the pipe line industry as "reconditioning" work. As a result of findings in 1960, 48 miles of line in Maine and Vermont were reconditioned last summer, and this year the remaining 42 miles of line will be reconditioned. When this has been done the entire 18" line between South Portland and Montreal East will be coated and wrapped for protection against corrosion.

This work this year will be divided into six stretches in the United States and one short 2.9 mile stretch in Canada. One work section will be about 13.2 miles lying on the Portland side of the company's Lancaster pump station on Route 2 in New Hampshire. Another stretch of about 5.2 miles lies alongside U. S. Route 2 in the towns of Gorham and Randolph, N. H. There is another stretch about 7 miles long near the Androscoggin River between Gilead, Maine and Shelburne, N. H. The remainder of the U. S. work is in Maine, consisting of two stretches totaling about 16.8 miles between Otisfield and the company's North Waterford pump station.

The short stretch in Canada is a short distance north of the border in the town of Sutton, Quebec.

The work is being done by Bethlehem Pipe Line Constructors of Bethel, Maine, the same

contractors who did last year's work. The procedure will be the same, starting with the uncovering of the pipe with backhoes. Then about May 22nd, after water has been pumped in both the 18" and 12" lines to displace the oil, flow will be stopped and three stretches of 18" pipe will be cut loose. Three corresponding stretches of 12" line will be cut and tied in to the 18" line at the ends of the three work stretches so as to form bypasses around the 18" pipe which is to be reconditioned. Following this, the 18" pipe will be lifted out and placed on wood supports called "skids". The pipe will be cleaned with a traveling cleaning machine, and then the longitudinal seams in the 18" pipe will be sandblasted, ground, and, if necessary, repairs made in it. Following this the pipe will be primed, coated and wrapped, using coal tar enamel reinforced with glass fiber and covered with asbestos felt wrapper.

After the first three stretches of line have been coated and wrapped and lowered into the ground again and backfilled, they will be reconnected in the 18" line. The 12" line will be reconnected as it originally was, and then three more stretches of line in the United States, averaging about 7 miles long, will be cut loose and bypassed by the 12" line. At the same time the short stretch in Canada will be disconnected and the 18" line stream routed around it through the 12". All work on these last four stretches is expected to be completed, with the lines reconnected and full capacity again available, on or before August 15th.

While Oklahoma Pipe Line Constructors will have a certain number of their supervisors and other key men from outside this area, they expect to employ a considerable number of additional local men

During the course of the reconditioning work between May 22nd and about August 15th, the capacity of the pipe line system will be reduced to about 130,000 barrels per day, although the average for the period will be slightly less than this because of the down time necessary to make the connections for cutting loose and tying in the sections of pipe.

Map Traces Nation's Westward Expansion

The trails, rivers and roads shown on this map trace the westward course of the nation's history. Moving out of the original thirteen colonies on the eastern shores of the new continent, restless American hunters, traders and settlers pushed steadily westward toward the Pacific. This map, which is distributed by the Eastern Esso Region of

the Humble Oil & Refining Company, also illustrates the nation's growth through annexation and purchase between 1776 and 1853, when a strip of southwestern border land was acquired from Mexico through the Gadsden Purchase. State capitals and the year each state was admitted to the Union are also shown.

6 tips that can help you get more warmth from your heating oil dollars

YOUR Shell Heating Oil supplier recommends these 6 ways to reduce heating costs and have a more comfortable home:

1. Keep your oil burner clean. Today's Shell Heating Oil contains special additive FOA-5X. It helps keep critical burner parts free from clogging—assures better firing.

2. Guard against tank rust. Shell Sonitor® anti-rust treatment helps protect your storage tank for one full year, at no extra cost.

3. Check your thermostat location. If your thermostat is in a stairwell, on an outside wall or near an outside entrance—it may cause your burner to operate more often than necessary.

4. Shut off radiators or registers in rooms that aren't in regular use.

5. When fireplaces are not in use, make sure dampers are securely shut.

6. Keep attic ventilators closed during the heating season.

A LICENSE TO LIVE

—IF ONLY!

More than 84,000,000 of today's 183,000,000 Americans are licensed to drive a motor vehicle. That is nearly half of the nation's entire population. And it is a major shame that all too often these licenses become licenses for recklessness.

Each year more than 10,000,000 traffic accidents occur in the United States. And the shocking fact is that only two out of every ten are caused by chronically reckless, irresponsible drivers. The other 80 per cent is the disgraceful handiwork of you and me, the "good drivers" and "good" citizens of our community and our nation.

Why we do it is for heaven to judge. But the fact is that 8,000,000 times a year we slip; we get too cocky... too headstrong... or too irate... or simply too careless... and we wind up lamenting "If Only,..." To drive home our part in the nation's critical traffic disgrace and to remind us of our individual responsibility, Bethel Jaycees, in cooperation with the United States Junior Chamber of Commerce and the Liberty Mutual Insurance Company, are conducting a safe-driving campaign in our town.

Under the theme "Don't be an If Only Driver," the Jaycees are pledged to the unenviable

task of saving us (and others) from ourselves. Surely we have every selfish—and humanitarian—reason for applauding and supporting their efforts. If we take their program to heart... if we heed their message... if we practice what we know to be right... our drivers' licenses can become licenses to live and to let live.

Long after the Jaycees' program has come and gone, we will drive free from accidents if only we remember their message: On the highway your safety is up to you!
